

# Oak Hill NexPoint Global Merger Arbitrage Fund

As of February 28, 2026

## INVESTMENT OBJECTIVE

Generate consistent, positive absolute returns, with low volatility and low correlation to equity markets by investing in securities in Canada, the United States and in other foreign jurisdictions.

## INVESTMENT STRATEGY

- Focus on merger arbitrage by investing in securities of companies that are involved in publicly announced mergers (including mergers through takeovers and tender offers.)
- Merger arbitrage is a highly specialized investment approach generally designed to profit from the successful completion of merger transactions.
- The simplest form of merger arbitrage activity involves purchasing the shares of an announced acquisition target at a discount to their expected value upon completion of the acquisition. The size of this discount, known as the arbitrage "spread" may represent the potential profit on such an investment.

## INVESTMENT RATIONALE

- Alternative investment that seeks to reduce overall portfolio volatility and correlation
- Potential alternative or complement to fixed income given similar levels of risk & volatility
